

ETHIOPIA

ADOLESCENTS 360 BASELINE SURVEY

INTERVIEWED: ● 1 region: 4 districts

♀ 1,198 married adolescent girls aged 15–19

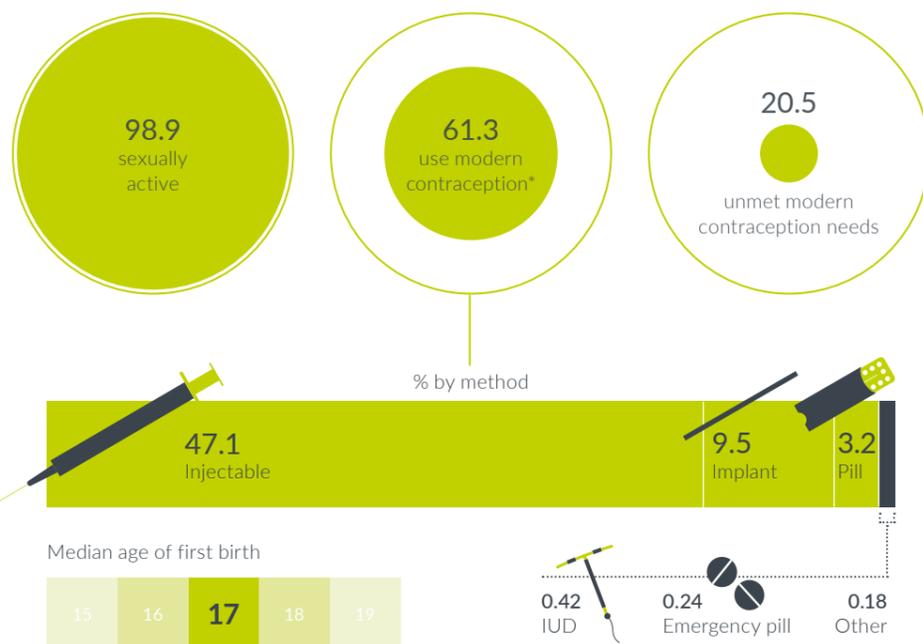

♂ 142 husbands

Adolescents 360 (A360) is a four-year initiative (2016–2020) to increase adolescent girls' access to and demand for modern contraception in Ethiopia, Nigeria and Tanzania. A360 is being implemented in four regions of Ethiopia; Amhara, Oromia, State of Southern Nations, Nationalities and Peoples' and Tigray. As part of the evaluation of A360 in Ethiopia, we sought to identify the key sexuality, fertility and family planning characteristics of the target population at baseline prior to A360 implementation in one region (Oromia). A360 targets married adolescents in Ethiopia.
