

# SOUTH NIGERIA

## ADOLESCENTS 360 BASELINE SURVEY

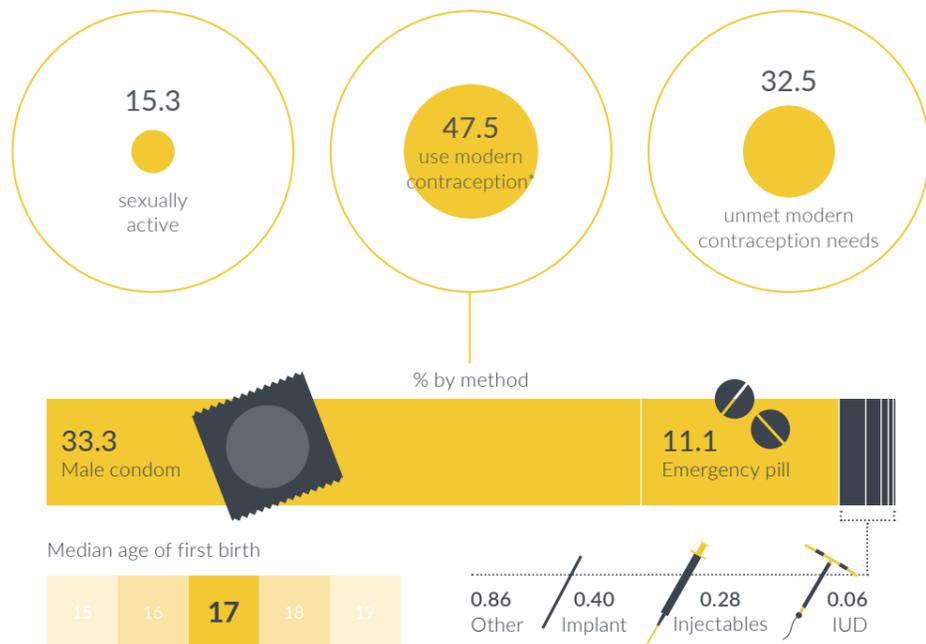

**INTERVIEWED:** ● **1 State: 2 districts**  
 ♀ **12,053** unmarried adolescent girls aged 15–19  
 👤 **337** co-habiting adults

Adolescents 360 (A360) is a four-year initiative (2016–2020) to increase adolescent girls' access to and demand for modern contraception in Ethiopia, Nigeria and Tanzania. A360 is being implemented in ten states in Nigeria, three states in the north (Federal Capital Territory, Nasarawa and Kaduna) and seven states in the south (Lagos, Osun, Ogun, Oyo, Edo, Delta and Akwa Ibom). As part of the evaluation of A360 in Southern Nigeria, we sought to identify the key sexuality, fertility and family planning characteristics of the target population at baseline prior to A360 implementation in one state (Ogun). A360 targets unmarried adolescents in Southern Nigeria.
